

The School Health Office

Each district elementary school has a Health/Attendance Technician and each middle and high school has a Senior Health Technician who is a licensed nurse. They are available during regular school hours to assist students in case of illness or accidents.

Our district Registered Credentialed School Nurses are available by appointment to discuss specific health conditions that may require special attention. You can email your school nurse by clicking on the name on the main [Health Services page](#). Health technicians and school nurses do not diagnose illnesses. Please consult your student's physician for concerns related to their health.

[School Nursing Services](#)- click on this link for a description of services offered by school nurses.
